i cant play it at all. I'd love my 0.49 cents back for this. Seriously. First, this game is unable to be set up for full-screen. An instand annoyance but, eh, whatever. Second, in order for the rats to actually move, you have to build the bridge exactly as orchestrated in hints. How are you even supposed to know what those parameters are without screenshotting each step along the way? Even if a bridge design is viable, the rats refuse to move and just stand there. Horrible game. I much preferred the Bridge Constructor Portal game over whatever this was supposed to be.. Pay 2 win. Set 2 groups of infantry against each other. My group was killed, vs 2 of them. And some godlike tanks etc, its just sad. Just don't spend time in the game, it has no tactics, as the odds are skewed if the other one pays. 8/10

Pros:

- Good history, music and graphics. V Buena historia, musica y graficos.
- Each character has its own personality and his own history behind it. V Cada personaje tiene su propia personalidad y una historia detras de el.
- Great skill system, similar to final fantasy 5. V Gran sistema de habilidades, similar a final fantasy 5.

Cons:

- Add a sound when you go to sleep and when you get a item, an encyclopedia where you can follow the history and side missions, and which contain descriptions of places, monsters, characters, etc, of the world of Advent. V Agregar un sonido cuando vas a dormir y cuando obtenes un objeto, una enciclopedia donde puedas seguir la historia y misiones secundarias, y que pueda contener descripciones de los lugares, monstruos, personajes, etc, del mundo de Advent.
- No Casino or minigames alike so far. V No Casino o minijuegos similares por ahora.. TL;DR: Its new and a little buggy but really fun. ("zen mode" in options removes the timer)

A VR experiance where the objective is to destroy everything. my childhood dreams are getting closer and closer.

Housekeeping VR is a fun little explore and destroy everything in your path kinda game. It got a pretty good smile in me and had me accidnetly punch my computer desk a few time on accident thrashing around breaking everything in the game. I guess I need a bigger playing area or foam padding on my controllers.

Here are a few things to point out. the "main game" is timed and its a pretty short timer however this is fine because in the options they have a "zen mode" where it removes the timer and money earning system and you just go around and break things taking your time.

I havent played much but I did enjoy all the little hidden things, the ghosts, the hidden room etc. Idk i just love stuff like that. Im sure there is V will be alot more in future updates. maybe hidden rooms behind walls. there is alot of room here for expansions beyond just breaking stuff. so many mini game ideas are running through my head with targets and mazes etc with this gameplay mechanic.

the game is at the time of writing this review very new and still being delevoped and It does show but its stuff I can look past as long as the devs keep working on this game. few things the game (i think when its loading things) gets very jittery. and fazes in and out of the game. also the hands are backwards so I need to switch my left and right controllers when I play. also another thing I just wanna put in here if the Devs are reading. the stuff seems to weak or im too strong. I feel like the Hulk trying to handle fine china sometimes. I try and pick a bottle up and it just explodes in my hands almost every time.

Overall for the price at the moment it is fun. It does need more in the future but for a preview and. Is it alpha or beta? ...im not sure V but still early development, its good.

. One of the best creation apps. Really the sky's the limit since you have full control down to the vertex level.

I normally use blender to do basic 3D low poly stuff but this is much more intuitive. Doesn't have every last feature but most of the basics are covered.

Also it's been getting frequent updates and the dev is very responsive. So it just Keeps getting better!. Play past the first level, It gets better after that.. For myt full review please vist:

And watch my video!. The game has nice, lengthy and narrated text adventures with lots of player choices, and even when multiple options sometimes lead to same conclusions they give a nice depth to the RPG part of the game. The game doesn't have the same feeling to it as the original tho: units have sort of "tiers" where the crappy ones deal ~50 dmg and the best ones ~400 so the army progression feels kind of forced. In the first game you faced giants with human spearmen, in this one you run around with magical ubersoldiers (or die). The game also lacks the whole economy aspect of the first title, so enlarging your empire feels meh. Performance in combat is suboptimal most of the time, even tho it doesn't make me want to die. If you like RPG elements, and running around a huge map with a personal army, you might enjoy this game. I would check out King's Bounty first though.. Brings back the feels from the old FPS days needs work but i had fun playing it.

You need a older mouse or a mouse with low DPI though, my Razer HYdra did not work with it had to dig up my old 2006 mouse.

A sort of easy-mode joke weapon that provides weak healing in place of previous games' Vital Stars. Its normal ability must be used in combat (anytime the Speed skill would be inactive), and provides a weak heal over time (1 pip every ~30 seconds). As with other Devil Breakers, being hit while this is active will destroy it. Its charged ability restores 3 pips of health and destroys the breaker.

And yes, it's a vibrator. The skill list refers to "jerking off" the breaker and "blowing the entire load". (\u0361\u00b0 \u035c\u0296 \u0361\u00b0). Fun game with lots of choices.. Astral masters was a good game and this is a much improved version. The cards are balanced and the gameplay is quite unique. The F2P price seems reasonable and progressin without \$\$ appears to be adequate, if a bit slow. This is offset by nice random deck and draft play modes.. Update: played it for ages and didnt recognize its early axcess and unfinished.

The dev should charge money for the reviews. They are twice worth the price of the game.. Fix game sound quality and annoying bugs in video screen. Otherwise: The game is good.. Everyone that enjoys side scrollers or owned a NES should just buy this game... I played this for 4 hours straight as soon as I started it! I am huge fan of it! I do recommend you grab a controller for this as its WAY more precise and will save you a lot of possible frustration (for me: it took it all away, made me able to grab level specific achievemtets eaisiy, and dying became harder to do). Honestly, if you are a retro game fan, just buy this game. You'll be glad you did! I am both!. the game is♥♥♥♥♥♥by itself, even if i didnt talk about how the game is locked behind a paywall and its just trying to mock our president
