Steroid-binding proteins in human saliva were investigated by an in vitro assay system. Each of 13 human saliva samples was shown to have at least one steroid-binding protein in a concentration range of 0.1-100 microM. The binding affinities and the proportions of the specific binding of each of several steroids to each of the saliva samples were different. There was no relationship between these parameters and the proportions of the salivary MUP-1 and MUP-2 proteins detected by means of the antibody-affinity column assay. The binding affinities of four steroids were correlated with their tissue distribution in the body. These results suggest that each saliva contains one or more salivary steroid-binding proteins and that the saliva of any individual may differ in their specificities. Demographics of Ghana This article is about the demographic features of the population of Ghana, including population density, ethnicity, education level, health of the populace, economic status, religious affiliations and other aspects of the population. Ghana has a population of 28,787,794 (2018 est.)—or roughly three times that of Illinois and over twice that of New York State. According to the Ghana Statistical Service, Ghana's population is approximately 40.2 million. As of the most recent Census in 2010, the total population of Ghana was 25,567,198. The Demographic and Health Survey estimates Ghana's population to be 28.8 million in the year 2000, about double what it was in 1990. According to estimates, Ghana has an average annual growth rate of 2.6 percent from 1975 to 2010. However, Ghana's fertility rate (4.6 births per woman) is relatively high compared to most of Africa and a lot of the developing world, but it has been declining since 2002. Ghana has one of the highest infant mortality rates in Africa, and it is the second poorest country in the world. However, the rate of infant mortality is decreasing as more people receive access to improved health services. Ghana ranks high on the index of human development. Ghana's economic output 82157476af
